

flo101 — Applied AI Engineer Assessment

CONTEXT

flo101 is building an agentic skilling platform focused on guided execution, feedback, dynamic learning flows, and verifiable proof-of-work rather than passive content consumption.

OBJECTIVE

Build the smallest useful AI workflow relevant to flo101. We are evaluating your product judgment, systems thinking, applied AI depth, execution quality, speed and prioritization, and founding-engineer ownership.

CHOOSE ONE BUILD TRACK

A) Mission Composer + Pathway Generator

Input: Learner goal, current level, time available, output goal.

↓

Generates: A structured mission, pathway of micro-experiences, a first task, and the rationale for the path.

B) Content Curator + Dynamic Case Builder

Input: Learning objective + small content set (URLs, docs, notes).

↓

Generates: A curated learning bundle, dynamic challenge, why inputs were chosen, and required output.

C) Critic Agent + Proof-of-Work Evaluator

Input: Learner artifact (e.g., brief, draft, code).

↓

Generates: Rubric-based evaluation, dimension-specific feedback, missing gaps, and the next best improvement step.

CONSTRAINTS

- **Timebox:** 6–8 hours maximum.
- **Scope:** Build the smallest useful version. Do *not* build the roleplay module.
- **Robustness:** Must explicitly handle at least 3 failure cases.
- **Evaluation:** Include at least 1 simple evaluation method for the AI outputs.
- **Tradeoffs:** Make at least 1 explicit tradeoff around cost, latency, UX, or reliability.

DELIVERABLES

- Code repository
- 3–5 minute demo video
- README (setup instructions)
- Architecture note (design & decisions)
- Product note (why this matters & metric)
- Evaluation note (quality & failures)
- AI usage disclosure (what was generated)

EVALUATION CRITERIA

- Problem framing & product judgment
- AI systems thinking
- End-to-end execution
- Evaluation & reliability
- Decision-making & tradeoffs
- Communication & ownership

TIMELINE

Please submit your materials within **3-5 calendar days** unless otherwise agreed. Shortlisted candidates will be invited to a 60–75 minute live walkthrough to defend architectural choices and adapt the workflow to new constraints.

SUBMISSION INSTRUCTIONS

Send all required deliverables in a single email or message with the subject line **"Applied AI Engineer Assessment — [Your Name]"** to avneer@flo101.com, riyatanisha@flo101.com
